

# Kary Mullis, the Inventor of the PCR Test, Explains Why Its Results Are Meaningless

December 1, 2020 [Marty Leeds 0](#)

Dr. Tom Cowan says that the PCR test is meaningless because it has never been standardized and compared to an isolated virus. He says that the package insert for the PCR test by Roche states, “This test is not to be used for diagnostic purposes.” Kary Mullis, the inventor of the PCR test who was awarded a Nobel Chemistry Prize, said that by using certain protocols for the PCR test, scientists can come up with results they want — he stated, “...with PCR, if you do it well, you can find almost anything in anybody.” 97% of Positive results are false Positive results.
